

INSTALLATION CAUTION!

SUBJECT: Installation of Pacbrake "Cobra Head" Exhaust Adapter

PART NUMBERS AFFECTED: C11969, C11970, C11982, C11985, C11986

The purpose of this Installation Caution notice is to ensure that the installer confirms the exhaust system support bracket is adequate for the additional weight. Pacbrake's "Cobra head" exhaust adapter weighs 7lbs. and the exhaust brake weighs 8lbs. This additional weight added to the turbocharger is not a concern providing the exhaust system is well supported to the engine and/or transmission. The exhaust system should have been supported to the engine or transmission by the VOEM at assembly. In most cases factory support brackets are adequate. If not, the original bracket must be reinforced or a bracket be added to prevent the possibility of turbocharger failure.
