

This document outlines the various Ford Bronco factory suspension packages and how to identify them.

HOSS SUSPENSION SYSTEMS ON 2021+ FORD BRONCO VEHICLES

Refer to product fitment guides to determine if a specific product is compatible with the suspension system present on a Bronco vehicle.

Table 1. Summary of HOSS Suspension Systems for Ford Bronco

SYSTEM	DESCRIPTION	IMAGE
HOSS 1.0	Standard OE suspension with fixed damping shocks. Identified by black or grey front shock tubes without Fox/Bilstein labelling. Sometimes an “ICON” label is located near the bottom of the front strut. Available on Base, Big Bend, Outer Banks, and Black Diamond models.	
HOSS 2.0	Bilstein suspension system. Identified by yellow Bilstein front shock tubes. Available on Badlands, Everglades, and Wildtrack (2021-2022) models. Also present on models equipped with the Sasquatch Package.	
HOSS 3.0	Fox internal bypass suspension. Identified by black front shock tubes with an external FOX labelled reservoir located by the lower control arm. Available on Wildtrack (2023+) models and Badlands (2025+).	
HOSS 4.0	Fox live valve system with external reservoir. Identified by black and orange front struts with an external reservoir, labelled “FOX Live Valve”, near the top of the strut. Available on Raptor models.
