REQUIREMENTS FOR 2007 - 2021 TOYOTA TUNDRA AIR SUSPENSION KIT

Aftermarket 5th wheel brackets are **compatible** with 2007 - 2021 Toyota Tundra air suspension kits **only** when **all clearance requirements shown below are met** on the inboard and outboard sides of the frame rails.

Blue components in images shown represent the OEM reinforcement plate welded to the frame, located above the rear axle. Exact geometry of the reinforcement plate may vary based on vehicle model year.

REQUIREMENTS:

1. The **red zones** indicated in Figures 1 & 2 must be clear for the installation of the aftermarket upper air suspension kit.
